

# climb-A™

---

## RockStep Solutions

RockStep's informatics software system, Climb™, helps drug companies solve the problems of data chaos and operational inefficiencies in R&D labs. Climb™ manages workflows, scheduling, tasks, animal health records, and data capture for researchers, study directors, lab technicians, veterinarians, and animal care takers.

RockStep has created an introductory package featuring all the best of Climb's animal management modules. *Climb for Animal Management (Climb-A)* includes:

- Breeding
  - Create mating pairs/triads/groups
  - Log litter information
  - Wean
- Receiving/Creating Animal Records in Bulk
- Census
  - Create your own custom reports by searching parameters in your colony
- Animal Health
  - Log observations
  - Create and execute treatment plans
- Animal Measurements and Tasks, e.g. body weight
- Cage Card Printing with QR Code
- Real Time Communication Center
- Full Audit Tracking

A demo video of Climb-A may be accessed [here](#).

Climb-A comes standard with RockStep's email support (8am-5pm ET) and access to the Climb-A online training manuals and videos.

To purchase Climb-A, please email [info@rockstepsolutions.com](mailto:info@rockstepsolutions.com) and include Climb-A in the email header.
